Coursework

Design Of Everyday Things
Data Science and Practice
Introduction to Computer Science and
Object Oriented Programing

About Me

I am fascinated with the intersection of intelligent design and human behavior. I have been drawn to design since I was a freshman in high school. Currently, I am a third year at University of California - San Diego, Studying Cognitive Science and minoring in Design. I am fascinated with the challenge of designing user centered products by understanding human behavior. I plan to use linguistics and psychology with experience and practice in design to solve these problems. I have experience with graphic design, user interaction design, user experience design and research. I want to gain more experience with user research, user experience and product management.

Education

University of California - San Diego | In progress
Major: Bachelor of Science in Cognitive Science
Minor: Design

Professional Experience

● **AI-Global.org**
Design Intern | June 2019 - Present
Researched and Designed main website
Conducted user testing and protyping on the application

● **Moores Cancer Center**
Web Developer Assistant | August 2019 - Present
Presented research with 3 designed mockups
Developed full website for potential

● **Center for Applied Internet and Data Analysis**
Graphic Design Intern | April 2019 - Present
Designed 2 logos for research projects
Updated graphics for physical displays

● **Winkielman Lab**
Research Assistant | January 2019 - Present
Assisted with study participants and discussions
Assisted with EMG studies, and data collection

● **Swing Golf App Startup**
UX Designer | August 2018 - February 2019
Conducted user research at golf ranges
Designed mockups of the tutorial demo

● **CognitiveScale**
UI Design Intern | June 2017 to July 2017
Designed a UI demo of a calendar for a hospital
Researched top AI trends in user interface
Completed a Design Thinking Workshop

Extracurricular

● **Design For America - UCSD**
Design Education Internal Lead | May 2019 - Present
Team Member | October 2018 - Present
Designed an app to help students with mental wellness
Conducted research on college students
Gathered insights and redesigned the application

● **Cogntive Science Student Association**
Executive in Logistics | May 2019 - Present
External Public Relations | May 2018- Present
Organized and registered rooms for events
Used Illustrator to create logos and t-shirts for national conference
